Editor's letter

Learn, Share, Enjoy

Welcome to ICT for Education Norwich. We know that technology has great potential to have positive effects on schools and all those in them, but sometimes it is difficult to find inspiration about how to make better use of what you've got or to plan ahead when your day-to-day working life is so busy. Keeping pace with advancing technologies, let alone managing increasingly numerous demands, regulations and interventions means that teaching, educating, and preparing learners for the future is far from straightforward. When you're up to your neck in alligators it is hard to remember that your original objective was to drain the swamp! Today's ICT for Education conference promises to highlight plenty of interesting ideas and practical innovations for you to take back to your schools. Our expert keynote speakers will cover a wide range of issues pertinent to your work.

In addition to the keynote speaking sessions there is ICT Product Reviews Live! An independent product review session that will put suppliers to the test and give you real insight into their product capabilities. Don't miss the exhibition hall where you can explore products and services suitable for your school. There will be ample opportunity to network with peers and colleagues and to share views and experiences of using ICT in education.

Thankyou for joining us today. I hope that you enjoy the conference and find it time well spent.

If you wish to speak at an ICT for Education Conference or Seminar or contribute an article to our newsletter, please contact Ian at il@ictforeducation.co.uk or speak to any of our team at the conference.

Best Wishes,

Sarah Underwood Editor. Ian Loosemore Owner.

Check out ICT Reviews Live!

09:00-09:40 in the conference room.

Exhibitors presenting:

ASUS • Canva for Education

EdTech.Direct • Getech

Schedule

07:30	Registration and Exhibition Opens, Networking over coffee and pastries.	
08:30 08:40	Introduction to the Conference: Dale Howarth, ICT for Education.	
08:40 09:00	Keynote 1 Tig Williams, CAS Master Teacher, Teacher Trainer and IT Professional.	
09:00 09:40	ICT Reviews Live!	An independent product review session that will put products to the test and give you real insight into their capabilities. Watch the reviews, comment on product content, consider underlying technologies, discuss ease of use and share your opinions on how you would like suppliers to develop products and services to meet the needs of teachers and schools.
09:40 10:25	Coffee and visit the Exhibition	
09:40 10:45	Keynote 2 Adam Gibson, Head of Computer Science at Neatherd High School, Dereham

12:10 12:30	Keynote 5 Tig Williams, CAS Master Teacher, Teacher Trainer and IT Professional.	
12:30 12:40	Closing Comments	

Exhibitor Profiles

Stand 1: InVentry

InVentry is the market leader for staff, visitor, and pupil management; trusted by over 10,000 schools. Their system transforms the efficiency of entry into your school and provides secure digital data on every entry or exit.

Designed to improve the safeguarding of pupils, through InVentry, you can keep an accurate log of who is on your site at any one time, giving you maximum traceability for staff contractors and visitors.

From late pupil arrivals to DBS information, InVentry seamlessly integrates with leading MIS providers, to ensure that your sign in information is always up to date.

Other features include:

- Contractor Management.
- Printed passes for late pupils.
- Fire and Trip Management.
- Access Invitations for visitors.
- Multi-site tracking.

As well as offering this, InVentry also provides an asset management software: Audit & Compliance. This solution delivers fast and cost-effective solutions for tracking assets in your school – providing a clear audit trail of usage to enable you to make informed decisions on your software and hardware investments.

Stand 2: 2Simple

2Simple has been making powerful and creative educational software for learners and schools for over 20 years. We are committed to providing creative, inclusive, and inspiring software to encourage children to love learning and prepare them for later life. Today our software and resources are used by learners in over 11,000 schools, in more than 70 countries.

2Simple can support you and your learners with a variety of resources and tools:

Purple Mash: A whole curricular resource that supports teachers with challenging subject areas or topics, whilst encouraging pupils to love learning.

Serial Mash: A vast online library of fiction and non-fiction books with activities and resources to encourage reading.

Evidence Me: The award-winning observation and assessment app that makes record-keeping effortless and secure.

Striver: Full PE scheme of work and dedicated wellbeing units. Every teacher in your school will have the confidence to deliver engaging PE lessons that boost primary pupils long-term physical and mental wellbeing.

Python in Pieces: An interactive coding environment designed to build student and teacher confidence with the text-based language of Python.

Know My School: Transform your school's self-evaluation and improvement planning, while ensuring a healthy work-life balance.

For more information please visit: www.2simple.com.

Stand 4: VEX Robotics

VEX Robotics is educational robotics for everyone. The VEX product continuum spans all levels of education with solutions tailored to EYFS and KS1 right through to university level.

Our products can be used both in the classroom and as part of extracurricular robotics competitions and our free virtual robotics coding tools mean that you can stretch your budget further when teaching with VEX.

The free STEM Labs curriculum and activities give teachers everything they need to deliver a rich STEM curriculum including presentations, hand-outs, lesson guides and more. No previous STEM experience is required, and the resources are linked to the National Curriculum Programmes of Study for Computing, Science, Design Technology and Maths.

Free online teacher certification, training webinars and face-to-face training ensure your staff have the knowledge they need to deliver a high-quality STEM curriculum.

Exhibitor Profiles

Stand 5: Vivi

Vivi is designed specifically for education, combining wireless screen sharing and digital signage into a solution. With Vivi, every screen in your school or MAT becomes a place to share content, build school spirit, and keep everyone informed, centrally managed by your IT team.

In the classroom, teachers use Vivi to create dynamic, engaging learning experiences by sharing their screen wirelessly, playing mixed media lessons, and moderating student screen sharing. Teachers are free to move around, creating an environment that brings students' attention away from their individual devices and back into the classroom.

Throughout the building, in both common areas and in classrooms, school administrators use Vivi to build a stronger school community, raise awareness of school events, and share essential information with their student body. And when it comes to safety, Vivi supplements existing emergency notification processes by triggering visual emergency communications to display across a network of screens in seconds, ensuring everyone is informed and prepared.

When schools choose Vivi, they not only extend the life of existing technology, increase their efficiency, and reduce their support costs, but they also empower their staff, faculty, and students with consistent, reliable and easy-to-use technology they'll love.

Stand 11: ClassVR

ClassVR from Avantis Education is an award-winning all-in-one VR and AR system for schools. First introduced in 2017, ClassVR has provided exceptional learning environments for more than **2 million students in 200,000+ classrooms** in 90 countries across the globe.

ClassVR is unique in that it was designed specifically for education. It includes all the hardware, software, tools, training, support, and implementation services needed to successfully deploy VR/AR technology in the classroom.

ClassVR headsets are classroom-ready, designed to be easy for students to use, and come in a rugged storage and charging case to ensure devices are always ready to go. ClassVR includes thousands of curriculum-aligned VR and AR lessons and resources to enhance lessons and engage students more deeply in content. Students can virtually examine once-hidden worlds, hold a beating heart in their hand, travel to far-off locations, and more.

The ClassVR teacher portal lets teachers control the content and guide students through the content, maximising learning.

ClassVR helps teachers:

- Create immersive, engaging lessons in a safe, controlled VR environment
- Improve students' knowledge, retention and understanding of academic concepts
- Spark students' imagination

ClassVR helps teachers push the boundaries of teaching and helps students meet learning goals through exciting, engaging, unforgettable VR experiences.

Stand 14: NAACE

The National Association for Education Technology

NAACE is a community of teachers, school leaders, advisors, consultants, and commercial partners working across all areas of UK education who share a vision for the developing role of technology in education.

As a professional association, we support schools to embed the use of technology by collating the latest research in our Advancing Education Journal, gathering evidence of good practice from schools that have been awarded NaaceMark, and providing access to our EdTech Review Framework to support schools in their EdTech journey.

We undertake independent research on behalf of our members into the state of education technology across the sector. These help us identify where we are now with EdTech in the UK, the challenges for schools, and the approaches that can be taken to address those challenges.

Who is NAACE?

NAACE members and sponsoring partners work in both public and private sectors. They represent a range of professions in the education sphere including teachers, school leaders, consultants, software developers, technicians, university lecturers, student teachers, company executives, national partners and colleagues from commerce and industry.

Our members and partners share a passion for embedding the effective use of technology into teaching, learning and school management. If you share this passion and are looking to collaborate with like-minded professionals, join NAACE to become a part of our community.

Exhibitor Profiles

Stand 15: NetSupport

For over 35 years, NetSupport has provided affordable, award-winning classroom instruction, online safety and IT management solutions for schools. Our solutions are built on impact, evidence and co-production to help schools manage and maximise their classroom and school-wide technology. With flexible cloud-based and on-premise solutions to engage and safeguard students – and even reduce costs – it's no wonder we have over 21 million users worldwide.

Our new cloud-based solution, classroom.cloud provides simple yet essential tools for flexible instruction in any setting. Combined with an online safety toolkit to provide a safe learning environment at all times, and IT management features to help schools centrally manage and maximise their edtech, classroom.cloud is a 3-in-1 award-winning solution, built on impact and evidence.

Meanwhile, NetSupport School is the market-leading and most feature-rich on-premise classroom instruction and monitoring solution, with a wealth of monitoring, control, collaboration and assessment features.

For technicians, NetSupport DNA provides network and IT management features to effectively track, monitor and manage IT assets and endpoints across a school or Trust – all from one central point. Meanwhile, its built-in online safety toolkit ensures schools can meet their eSafety requirements with proactive and reactive tools.

Stand 16: Getech

As Google's leading Premier Partner in the UK and Lenovo's largest Education Partner in Europe, Getech has been a trusted technology partner for schools, colleges and universities across the UK and Ireland for over 30 years. A deep understanding of our product portfolio coupled with a consultative approach to problem-solving for our customers enables us to deliver technology that works as intended, on-budget and beyond expectations.

For schools and colleges that don't have teams of in-house IT experts on call, we offer a catalogue of partner services from pre-shipment configuration and asset tagging of devices to CPD training for educators and administrators, change management, security audits, cloud migrations and more.

Beyond IT procurement and deployment support, we also help schools to address the STEM skills shortage by providing fun and engaging, hands-on learning activities aligned to the national curriculum with LEGO Education. By dispelling the misconceptions that Science is boring and Maths is hard while giving the tools for teachers to implement coding into their classroom projects as early as Key Stage 2, we aim to give all young minds access to the platforms that will prepare them for any career in the 21st Century workforce.

Visit our stand for a quick chat about your next technology challenge and come away with a better understanding of how we can make IT easy for you.

Stand 17: Satchel

Satchel provides a suite of educational products and services with a strong focus on classroom and behaviour management, school improvement and whole-school wellbeing. This year, Satchel expanded their award-winning learning platform Satchel One into a cloud MIS, providing everything a school needs to run from one login.

Satchel One acts as a school's centralised point for all their teaching and learning needs, storing the necessary data schools need to assess students' learning progression as well as providing a holistic view of their development. It's also the school management system that has grown from a learning platform to put everything you need to run and manage your school under one roof.

Stand 20: OrCam

Powered by globally-awarded AI technology, OrCam Learn is a game-changing solution that offers practical reading support and feedback to students, while empowering educators with data and analytics to better guide their students' academic journeys – so challenged readers can become independent readers, enjoy learning, and grow their confidence.

Students can now read any text independently simply points & clicks for OrCam Learn to read a full printed page or screen out loud! Including from a book, tablet, or classroom handout.

With the "Reading Pal" feature, learners read any text to the device and receive conversational and encouraging responses. Then OrCam Learn assesses the child's reading comprehension by asking content-related questions – and provides real-time feedback.

Additional features include:

- Dictionary.
- Translation from English to 20 other Languages.
- Summarization feature.
- Quiz Mode to enhance comprehension.

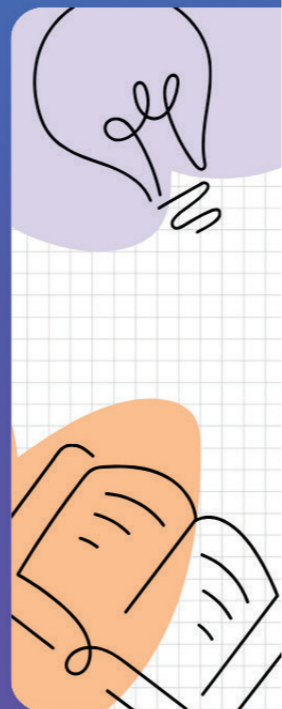

OrCam Learn provides teachers with the insight and support with its ongoing progress tracking to guide students with learning challenges more effectively; freeing them up to spend less time assessing and more time teaching.

The Exam Mode allows students to take exams with their entire class, freeing up scheduling and space constraints.

Stand 27: NCCE

The Norfolk Computing Hub has been supporting schools to provide a world class computing education for learners from KS1 to A level through direct school support, CPD, physical kit loans and a fully resourced, free curriculum.

The NCCE Quality Computing Framework (CQF) is central to the current support offer and many schools in the county have completed this to achieve their Computing Quality Mark. This provides assurance of a commitment to the subject and evidence of a fully rounded offer, supported by all stakeholders, to benefit young people.

2024 saw the launch of the I Belong programme which has at its core the inclusion of girls in computing, the fastest growing STEM subject. We're looking for teachers who are paving the way for girls in computer science to join our mission by becoming I Belong Champions and improve the gender balance in the subject and in industry.

The NCCE is in its 5th year and is fully funded by the DfE and continues to provide high quality support through new additions to its programme for the education sector in the county. All of our support is free to non-fee-paying schools.
