Work with ICT Media and do business with UK schools

Sapientia is the ICT for Education newsletter. Published 3 times during the academic year Sapientia is targeted at dedicated, passionate, and influential computer science teachers and those tasked with making technology a key part of the school curriculum.

100% requested and with a circulation to 40,000 education professionals nation-wide, Sapientia affords a sole sponsorship opportunity for a supplier to display their credentials as an authoritative and trusted player in the education sector.

With an established track record of bringing schools and technology suppliers together, the ICT for Education brand is the right place for your company to get the best return on its marketing spend. Trusted, proven, value for money. You've taken the right decision when you work with us.

If you wish to do business with schools, do business with ICT Media. Contact us today!

" Getech have worked with ICT for Education for 6 years and their events have consistently proved to be good at getting us closer to new prospects around the country as well as providing us with a better understanding of the changing challenges within the sector over time.

We will continue to work with ICT for Education as it provides us with a clear and measurable ROI on our marketing investments unlike so many other initiatives we get involved with. "

Richard Maclean - *Business Development Director & Google Lead*

Getech

ICT for Education Conferences

Exhibitor opportunities include: Exhibition Stands / Speaking slots / Sponsorship / PRL & promotional opportunities

" It was great to see so many attendees at the conference today and some really good conversations with a number of educators. Great day and event! "

Chris Godsalve - Aver Information Europe

With a proven track record of hosting regional events since 2012 ICT for Education conferences are focussed on the use of IT in the classroom and school to improve learning and raise standards. Suppliers can meet teachers and schools in a relaxed and friendly environment to show how their products and services can help schools put technology at the heart of education.

ICT for Education Seminars

" The ICT for Education events have been a highlight of my calendar for a number of years now, as these have provided a brilliant opportunity to engage with teachers and the ed tech industry. "

Prof. Miles Berry MA MBA FBCS FCCT SFHEA - Professor of Computing Education | University of Roehampton

ICT for Education seminars are local events focussing on a key technology topic relevant to teachers and schools. They offer an exclusive opportunity for a supplier to show how they can help teachers and schools use technology to provide the best possible learning environment.
